

Circe Invest Receives Back-to-Back Nomination at the Investment Sustainability Awards 2025

July 22, 2025

Circe Invest is proud to announce its nomination — for the second consecutive year — at the Investment Sustainability Awards, in the category *Best Sustainable Investment Technology and Support Services Provider*.

This category recognises firms that contribute meaningfully to the sustainable investment ecosystem through innovative platforms and specialised services, with a strong focus on responsiveness, resilience, and real-world impact.

Founded in 2023, Circe Invest supports global asset owners and managers in embedding sustainability, governance, and systemic thinking into their investment frameworks. The nomination reflects the firm's commitment to helping clients navigate an increasingly complex and interconnected financial landscape, while aligning investment strategies with long-term sustainability objectives.

The nomination also highlights the importance of partnerships and independent expertise in advancing responsible finance. Circe Invest's ongoing work is rooted in the belief that the evolution of capital markets requires equally adaptive and forward-thinking solutions — ones that integrate sustainability not as an overlay but as a core principle of investment decision-making.

This year's shortlist also includes GIST Impact, a technology company specialising in impact data and analytics. Circe Invest welcomes this recognition and is proud of its connection to GIST Impact through Fiona Frick's role on the Advisory Board, further reinforcing a shared mission to advance actionable and transparent approaches to sustainable finance.

Circe Invest extends its appreciation to the organisers of the Investment Sustainability Awards for acknowledging the role of independent firms in driving progress across the industry. The nomination is also a reflection of the firm's close collaboration with clients, partners, and peers who continue to inspire and challenge its work each day.
